Thank you for your continued support of the International Plan!

This packet has been prepared to update you on highlights from the past year and new developments in the program, and to provide helpful tips and resources that you may draw upon when advising on the International Plan.

Please do not hesitate to contact me if you have any questions or concerns about the program.

International Plan
Jennifer Evanuik Baird, Assistant Director
Office of International Education
Savant Building, Suite 211
404-894-7475  internationalplan@oie.gatech.edu

http://internationalplan.gatech.edu
Highlights:

IP Section of GT 1000 will be offered Fall 2014!
• Please encourage IP Freshmen to register for the new IP section of GT 1000 (taught by Jennifer Baird). This course will help new IP students start to plan their IP journeys, allow them to bond with other IP students, and will introduce concepts of intercultural communication, in addition to standard GT 1000 curriculum.

New retention efforts put in place by the IP Committee:
• Newly accepted IP students are required to complete a comprehensive online orientation shortly after being accepted.
• First year students in the IP are required to attend a group advising meeting in the spring term. This meeting covers topics such as registering for the globally-focused coursework, how to choose coherent international experiences, and other tips on completing the IP.
• Second and third year students will be asked to meet with an advisor once a year to review their progress in the IP (and decide whether to continue or withdraw).
• Students in their final year need to declare to the IP advisor in OIE and their IP faculty representative that they will be completing the IP requirements (i.e. taking the IP Capstone, and remaining requirements, and filling out the IP Degree Designation Form)

Revamped IP materials:
• The IP brochure has been redesigned – if you’d like some, please contact Jennifer Baird.
• The OIE / IP website is being redesigned and will launch Summer 2014.
• IP FASET materials have a new look! Revisions are meant to give more information upfront to matriculating students to help them make informed decisions from the start.
Participation & Graduation Figures

783 students enrolled in the IP as of May 2014
- Engineering = 56%
- Ivan Allen = 15% (excludes CM)
- Business = 11%
- Computing = 9% (includes CM)
- Science = 6%
- Architecture = 3%

31 IP graduates in AY 2013-14
- This is a 35% increase over AY 2012-13!
- Brings IP Graduate total to 164 students.
- Graduates by Major:
  - 6 ISYE
  - 6 ME
  - 4 CM
  - 3 BME
  - 3 INTA
  - 2 ARCH
  - 2 AE
  - 1 CompE
  - 1 CS
  - 1 EIA
  - 1 BA/MGT
  - 1 STAC

Ayanda Francis, ‘14, EIA-IP, has received a Fulbright Award to teach English in Turkey.
How can advisors contribute to the success of the IP?

- Encourage students to **stay on track**; remind them about taking the globally-focused coursework and language classes in a timely manner.

- Help students determine how the IP globally-focused courses **may be used for other degree requirements**.

- Encourage students to consider **different types of international experiences**.
  - We have over 100 exchange programs, 35 faculty-led study abroad programs, myriad international internship opportunities, and research abroad opportunities. IP students should research the best programs for their academic and linguistic goals – not just sign up for the first program they hear about.

- Rising seniors – If they are about to take their **Capstone course**, they should consult with the major’s faculty representative and the IP Assistant Director.

- Upcoming graduates must complete the IP **Degree Designation form** a semester prior to graduation.

- If students are no longer interested or know that they will not complete the requirements, they should **officially withdraw** from IP via the online cancellation form: [http://oie.gatech.edu/content/international-plan-cancellation](http://oie.gatech.edu/content/international-plan-cancellation)
OIE has made several resources and tools available to help you (and your students) understand IP requirements and track student progress:

- **IP-specific reports on GT Reports.** These reports are used primarily by OIE for IP administrative purposes, however, academic advisors are encouraged to use them as well. If you would like access to these reports, you must first have access to BPROD and DWPROD databases in Banner. To request access to the reports, send your GT username (ex: jevanuik3) to internationalplan@oie.gatech.edu.

- **Periodic data reports.** Each semester, OIE will provide up-to-date reports to each academic unit. These reports will tell you which of your students are in the IP, which requirements they have completed/are lacking, and which students are on track to graduate with the IP designation.

- **Advising Worksheets.** A variety of advising sheets are available on the IP website, such as: “How to choose your international experience”; “How to register for globally-focused courses”; and “How to prepare for the ACTFL language proficiency interview”. Also online is the Requirements checklist.

- **IP Tracks.** IP Tracks is a great resource to help students start identifying coherent international experiences. Based on actual past examples of what previous IP students have done, and on known opportunities for various majors, TRACKS provides feasible and coherent combinations of international experiences that are appropriate for different majors and linguistic areas. Students are not limited to these examples, but they are a great starting place to help them imagine the possibilities. [http://www.internationalplan.gatech.edu/iptracks](http://www.internationalplan.gatech.edu/iptracks)

- **Lists of the IP globally-focused courses** that are being offered each term are circulated by the IP Assistant Director.

- The **IP Newsletter** is sent once a month during the fall and spring to all IP students and the IP Committee. If you would like to receive the newsletter, contact Jennifer Baird.

[http://internationalplan.gatech.edu](http://internationalplan.gatech.edu)
There are many resources available for students and staff who work with the International Plan. The list below helps distinguish who best to refer to for particular concerns and questions.

## Frequently Asked Questions

### What is the IP and what is its value?

| What is the International Plan? | The IP is a challenging program for undergraduate students focused on **developing global competency** in one’s major. Students in the IP complete a set of academic and experiential components as part of their degree requirements, including **globally-focused coursework**, a minimum of six months spent studying, working, or conducting research abroad, **foreign language proficiency**, and a senior level **capstone course**. Successful completion of the IP results in a special **designation on the diploma** and transcript. |
| Why should students join? | The IP is designed to position students to **become leaders** in this increasingly globalized economy. By participating in the program, students have the opportunity to gain the skills and perspectives that are highly valued by top global employers. Students learn to **adapt to and be successful in diverse** environments and gain the ability to **effectively communicate** in different cultures. IP students also understand how their field is **practiced in different cultural settings**. IP graduates have an overall **better job outlook** in terms of opportunities, salaries, and future job advancement. |
| How is the IP different than studying abroad? | While studying abroad may be a component of the IP, it does not end there. The IP asks students to take part in **internationally-focused academic and experiential elements** throughout their time at Tech. Students in the IP will complete coursework which complements their international experiences and they will necessarily develop at minimum an intermediate level of second language proficiency. The main identifying feature of the IP is the idea of **coherence**. All of the components of the IP should relate to each other in such a way that each participant develops a **unique outlook on their major from a specific linguistic and cultural context**. Some students choose to focus on two different countries/cultures rather than one in order to gain a comparative perspective of their major. |

“The International Plan has helped me to better understand the global implications of my field.” - Andrew Burrell, ’12, B.S. AE-IP

[http://internationalplan.gatech.edu](http://internationalplan.gatech.edu)
### IP Admissions

| Who is eligible? | The IP is open to any Georgia Tech degree-seeking undergraduate student in a participating major. Ideally students should apply within the first two semesters of their college career, although students of all years are welcome to apply.  
- Have and maintain a 2.7 GPA (no requirement for first-semester freshmen)  
- Have a strong interest in developing global competencies in an intentional and coherent way vis-à-vis the major  
- Submit an online application: http://www.internationalplan.gatech.edu/apply |
| Can Dual Majors participate? | Yes, they can even earn the International Plan designation for both majors (assuming both are participating majors). The only additional requirement is that both of the major advisors must approve of the student’s international experiences and the IP capstone must be taken for both majors. All other requirements are only required to be completed once. |
| Can international students participate in the IP? | Yes, but there are two stipulations:  
1. They must not return to their home country for their international experiences.  
2. They must be working on a Georgia Tech undergraduate degree (degree-seeking); exchange students cannot participate. |
| Can transfer students participate? | Yes, but international experiences must be fulfilled while enrolled at GT. If coursework taken elsewhere transfers to GT as an equivalent course that is on the list of IP approved course, then that coursework will count toward the IP. |

“I feel much more equipped to interact with people from any international background. While working in research and development for the oil industry, I found that there was a demand for my willingness and capability to work on cross-cultural teams. Oil companies have field positions in over 100 countries, so my ability to adapt and respond well to new cultures is critical”.

– Hannah Oermann, ’13, B.S. Mechanical Engineering – International Plan

## IP Requirement Details

| What are the basic requirements? | The International Plan requirements are:
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Complete at least 26 weeks abroad (two terms) participating in coherent international experiences.</td>
<td>2. Complete at least 26 weeks abroad (two terms) participating in coherent international experiences.</td>
</tr>
<tr>
<td>3. Demonstrate proficiency in a foreign language equivalent to the 2002 level. The language is usually related to the international experiences.</td>
<td>3. Demonstrate proficiency in a foreign language equivalent to the 2002 level. The language is usually related to the international experiences.</td>
</tr>
<tr>
<td>4. Complete a major-related IP capstone.</td>
<td>4. Complete a major-related IP capstone.</td>
</tr>
<tr>
<td>5. Maintain an overall 2.7 GPA.</td>
<td>5. Maintain an overall 2.7 GPA.</td>
</tr>
</tbody>
</table>

| What does the language proficiency entail? | The language should relate to the location of the international experience (except in cases where the language is not taught at GT). The typical way students attain this requirement is by taking through the 2002 level of their IP language. Students who develop proficiency outside of the classroom must show their proficiency through a language placement test, AP score, ACTFL exam or other method as determined by the School of Modern Languages. Students who develop advanced proficiency may pursue the optional “Language Proficiency Distinction” by passing the ACTFL Oral Proficiency Interview. |

| What do the globally focused courses entail? | Students must take one course in each of three areas: international relations, global economics, and a course pertaining to the country/region of the international experience. A full list of approved IP courses is in the GT course catalog. (Courses not currently listed can be petitioned to count.) Most of the courses also count toward SS, HUM, and/or the global perspective degree requirements. |

http://www.catalog.gatech.edu/specialacademic/international.php

Please note AP course credit does not count toward this requirement.

“Living abroad forces you to think outside the ‘American box’. My internship abroad gave me excellent skills and overall looked very good on my resume when interviewing. Every interviewer commented on my International Plan experiences and said that I have a very diverse resume.”

– Christopher Norris, ’13, B.S. Computer Engineering – International Plan

http://internationalplan.gatech.edu
## International Plan

### IP Requirement Details

<table>
<thead>
<tr>
<th>Question</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>What does the international experience entail?</td>
<td>Students must complete a minimum of 26 weeks abroad engaged in study, internship, and/or research. The 26 weeks should occur over two terms; only one term can be a summer. Students are free to go abroad more, but should pick the two most coherent experiences to count toward the International Plan. It is important to note that the two experiences abroad must be either linguistically or intellectually coherent.</td>
</tr>
</tbody>
</table>
| What do we mean by “coherence”?                              | Coherence refers to the relationship between the international experiences and, in most cases, the student’s IP language. Coherence can be linguistic/cultural or intellectual.  
  - **Linguistic/Cultural**: The international experience destinations share the same language or have similar cultures (e.g. Spain and Argentina).  
  - **Intellectual**: The international experiences do not share a language or culture, but do share a connection related to a specific aspect of the student’s field of study (e.g. an ISyE student who takes logistics coursework in Singapore and interns with logistics group of DHL in Dubai; a CM student who participates in the CS-focused Barcelona summer program and then studies for a semester at GT’s exchange partner in Copenhagen which has a special CM program).  
  Intellectual coherence must be approved by the major IP Faculty Representative before a student goes abroad. The student must make their case through a written argument attached to their International Experience Approval Form. |
| What does the globally focused capstone entail?               | Depending on the major, students must take their senior capstone/design/seminar course and include an international component into their project (such as a comparison of domestic versus foreign use of a product, etc.). This capstone is typically the same one that other seniors take, but contains an added component for International Plan students. Students should contact their IP Faculty Representative for details before registering for the capstone. Approved capstone courses are listed on the IP section of the GT course catalog: [http://www.catalog.gatech.edu/specialacademic/international.php](http://www.catalog.gatech.edu/specialacademic/international.php) |
| What does a student need to do leading up to graduation?      | Students who are eligible to receive the IP designation should meet with the IP Assistant Director a **semester prior** to their graduation to complete a **degree audit** and to fill out the IP Degree Designation Form. The Form must also be signed by someone in the major school. |
