Overseas Research Internships & Fellowships

**Amgen Scholars, Kyoto/Tokyo, Japan**
8-week paid research at University of Tokyo or Kyoto University. Open to (sophomores, juniors, and returning seniors). GT students will only be able to register for the nine-credit GIP course.

*University of Tokyo:* Prefer students committed to or who are considering a career in biology or related sciences and have biomedical research experience in the basic and translational sciences.

*Kyoto University:* Engineering, Biostudies, Medicine, Science, Agriculture, and Global Environmental Studies.

**Application Deadline:** February 1, 2017

**DAAD, Various Locations, Germany**
Students are complete a summer research internship with a host university or institute according to their area of interest (biology, chemistry, physics, earth sciences, engineering, or a closely related field). Monthly stipend, housing assistance, and a Ph.D. student mentors are available. German is not required.

**Application Deadline:** January 15, 2017

**EPFL- Ecole Polytechnique Fédérale de Lausanne (Federal Institute of Technology in Lausanne) Research Internship Program, Lausanne, Switzerland**
3, 4 or 6 month internship in research laboratories in the following schools: School of Computer and Communication Sciences; School of Architecture, Civil and Environmental Engineering (Chemistry, Mathematics, Physics); School of Basic Sciences; School of Engineering; School of Life Sciences. Selected students will receive prestigious scholarship for living and some traveling expenses. Can be combined with semester exchange program.

**Application Deadline:** January 15, 2017

**Industrial Technology Research Institute, Taiwan**
10 week summer internship with accommodation, monthly stipend, and subsidized travels. Available in various fields smart living (ICT, cloud computing, big data, logistics, devices), quality health (biologics, medical devices, healthcare), and sustainable environment (energy conservation, carbon reduction, green manufacturing). 4-6 month internships available in Spring/Winter

**Application Deadline:** End of February

**Engineering Internship, McGill University, Montreal, Canada**
16 weeks SURE (Summer Undergraduate Research in Engineering) in various research facilities and labs with academic researchers and graduate students. Workshops throughout program for constructing and presenting research findings. Final presentation to referees, faculty, students, staff, industrial partners and donors, McGill community. Minimum GPA 3.0

**Application Deadline:** End of January

**Nakatani RIES: Research & International Experiences for Students, Various Locations, Japan**
13 weeks summer research internship for U.S. *freshmen and sophomore* students. Program includes orientation at Rice University, 3-week language and cultural orientation in Japan, 9-week research at university of research institution, and final poster presentation at Rice University. ALL travel, tuition, health insurance, housing cost covered as well as a small stipend.

- Open to U.S. citizens or permanent resident over 18 years old
- Majoring in science/engineering with GPA above 3.0.
- Must show demonstrated interest in international engineering/science research particularly in Japan and future graduate study.

**Application Deadline:** January 12, 2017 (midnight of local time zone)

**National Science Foundation (NSF), Various Locations around the world**
NSF’s Office of International Science and Engineering supports programs for international research and education opportunities. Most opportunities are funded.

**Application Deadline:** Dependent on program
Research Internship, Okinawa Institute of Science and Technology (OIST), Okinawa, Japan
Open to undergraduate and graduate students working in the direction of a professor at OIST. Placements are awarded 4 times a year for 2-6 month (10-12 weeks) research internships. Small living allowance, commuting support, and travel expenses covered. 2017 availability and projects are listed on website (50 opportunities+).

*Application Deadline: 6 months before start date*

Pontificia Universidad Catolica de Chile (PUC), Santiago, Chile
Students can conduct research-based internship with PUC faculty in any semester. Unpaid Internships

*Application Deadline: Rolling*

ThinkSwiss Research Scholarship, Various Universities, Switzerland
Helps fund summer and fall research projects at top Swiss universities. Undergraduates (above sophomore) and graduates of all fields can apply to do 2-3 month research internships. Students must independently contact a Swiss professor to receive an invitation to conduct the project. Monthly scholarship (USD 1100). No foreign language skills necessary but beneficial to know any of the Swiss national languages.

*Application Deadline: January 31, 2017*

Practical Research Experience Program, Technical University of Munich, Germany
11 weeks research on a project under TUM faculty. Participants will further refine their research skills, learn more about German education and research landscape, members of TUM. Sophomore and above are eligible to apply and no German language proficiency is required to participate in the program. Available projects posted on website. Unpaid.

*Application Deadline: December 1, 2016*

Research in Gravitational-Wave Physics (REU), University of Florida, Labs in Europe, Australia, or Asia
Sponsored by NSF, this 9-10 week program expose students to the rigors of gravitational physics research in best labs around the world. Students receive stipend of ~$5000. Open to U.S. Residents and Citizens.

*Application Deadline: December 15, 2016*

Optics in the City of Light (REU), University of Michigan, Various locations in Paris, France
Junior level students spend 2 months in a variety of labs in Paris performing research with ultra-fast lasers. Students will spend one week in Ann Arbor at CUOS for orientation, safety training, preparation for living in France, and immersion into the Ann Arbor laboratories of the REU faculty. Stipend of ~$5000. Open to U.S. Residents and Citizens.

*Application Deadline: January 18, 2016*

### Graduate Specific Opportunities

RIKEN Brain Science Institute (RIKEN BSI) Summer Program, Tokyo, Japan
Summer program to train advanced students interested in brain function. Choose between 2-month laboratory internship and intensive 5-day lecture course.

*Application OPENS: December 2016*

Whitaker International Fellows and Scholars Program, Various locations outside U.S. and Canada
Program is for graduate biomedical engineering students to do research at university, lab, policy institute, or in industry.

*Application Deadline: January 17, 2017*

Taiwan International Graduate Program, Taiwan
2 month research internship in science and computing fields

*Application Deadline: End of January/Early February*

Swiss Government Excellence Research Scholarships
Selected applicants research in their PhD or medical specialization in one of 10 public Swiss universities

*Application Deadline: ~December*
